

Jupyter Notebook Guide – Offline Access for Windows

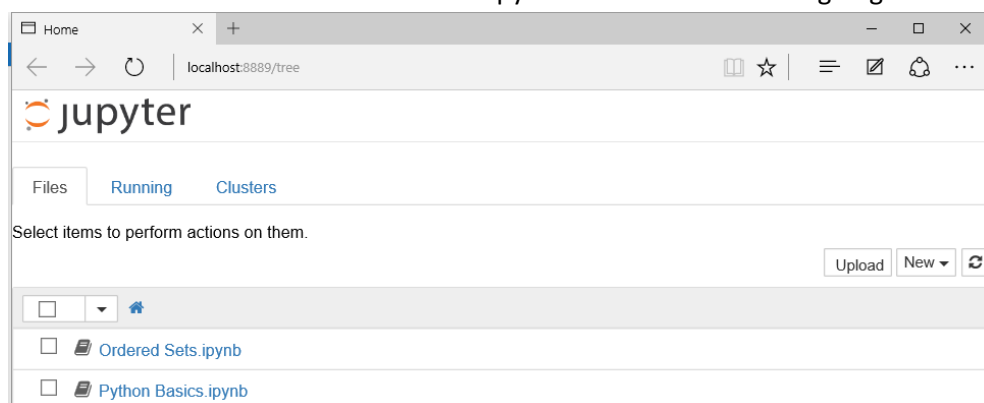

1. First download Anaconda Scientific Python Distribution from <https://www.anaconda.com/download/>. Download the *Python 3.x* version.

2. You can launch Jupyter from the start menu under the *Anaconda* folder or search for “Jupyter Notebook”.

3. The browser should open after a while, showing all the files in the folder. You will then need to navigate to where you saved the elearn files in the browser. The .ipynb files are what we are going to use in class.

4. Codes can be executed in any of the text boxes by pressing Shift + Enter.
(Before pressing Shift + Enter)

(After pressing Shift + Enter)
